Inspection Report

No: <u>JC202302004</u> Page <u>1</u> of <u>4</u> pages

Inspection items: Run-in test of Cyclone seal in sand slurry Test Date: From Feb.28,2023

(max. Concentration in general meaning and adding run-out)

To: Mar.20,2023

Inspection results

Inspection item		Unit	Nameplate parameter	Technical requirements	Inspected data			Result	
Performa nce Test	Leakag e	mL/h		≤5.0	0*		0**		Pass
Wear Loss		mm		≤0.02	SC Rotary Face	Before 15.620	After 15.620	Loss 0	Pass
					SC Stationary	Before	After	Loss	Pass
					Thickness	16.230	16.225	0.005	

Remarks: * It is the average leakage volume during the whole test time.

Running condition:

	Media	Pressure	Temperature	Test Time	Speed	Shaft	Flush or
		(MPa)	(℃)		(r/min)	(mm)	Quench
Performance Test	Sand Slurry ≤35%	0.05	18-48	8hours per day, running 15days. 120hours in total	1490-149 3	60	No Flush, No Quench

Remarks: * Sand Slurry concentration definition means, for every 1000 grams of sand slurry, the percentage of the mass of hard solid sand particles obtained by removing water to the mass of the sand slurry. Test measured sand slurry concentration is 33% to 35% Flush or Quench: This test was done without any flush or quench.

Shaft runout: In order to simulate the field conditions, the radial runout of 0.1mm is deliberately added to the standard testing.

^{**} It is the maximum average leakage volume in each measurement time unit

Test Date: Feb.28,2023

To: Mar.20,2023

Test Result:

		Model	318СҮС Ф60тт				
Product	Mechanical Seal	Trademark	AIGI				
		Inspection type	Performance Test				
Manufacturer	facturer AIGI Environmental Inc.		Qualified				
Address	81Suyuan Ave., Nanjing, China 211100	Starting date	Feb. 27,2023				
Quantity of samples	1 set	Sample number	WT202301020				
Standard	JB/T 4127.1-2013 "Mechanical Seal - Part1: Specification" GB/T 33509-2017 "General specification for mechanical seals" GB/T 14211-2019 "Test method of mechanical seal"						
Test items	Performance test, wear loss						
Result	The results of the items tested by the sample meet the requirements according to JB/T 4127.1-2013 "Mechanical Seal - Part1: Specification" and GB/T 33509-2017 "General Specification for Mechanical Seals".。 Date of issue: Mar.21,2023						
Remarks
